Infrastructure Baseline

*Providing Fact Based Models for Real Decision Making*

To properly plan for change a company needs to understand its current environment and the stresses it may feel. Optimally you would evaluate where you are and model where you would like to be. But how do you do that? What tools are available? Who has the data? These are the challenges that must be dealt with by the executive in charge of the most valuable assets in the company.

Make Infrastructure Decisions Based on Facts

Cornerstone can quickly baseline your company's infrastructure and provide you the tools and knowledge you need to properly model the future. We have partnered with Sumerian, Inc., to provide the most comprehensive toolset available. Most IT departments are so focused on real time problem resolution, or day-to-day operational issues that they can't develop a fact based foundation of data on which to model. Cornerstone's approach reduces costs through rightsizing of the infrastructure, reduces on-going costs, and speeds delivery of assets to the organization.

Key Value:

- *Understanding where you are helps control costs and plan for the future*

- *Cornerstone's Infrastructure Baseline takes a holistic view, but can be customized to the areas of most concern*

- *Baselining can be delivered through a cloud based solution and constantly monitored or periodically refreshed*

- *Cornerstone's Infrastructure Baseline can be executed as quickly as a few short weeks, providing real results that can be actioned*

Infrastructure Baseline

Infrastructure Baseline

- *Sunburst visualizations summarize your large volumes of data into easy to understand graphical representations.*
- *Data sets are easily traversed with drill down capabilities to get to the details of a particular area.*

The Infrastructure Baseline will encompass the review and assessment of

- What inventory exists – and where
- How are resources being utilized
- How are applications performing
- How does it all work together

Cornerstone
Data Strategies

A Lightweight Solution to Providing Facts

A fast paced, two phase project quickly delivers results through a customized workable application for your ongoing use. Cornerstone consultants and Sumerian Data Scientists will work closely with your team to quickly identify the data needs and model the results..

Discovery

Cornerstone consultant will be on-site to work with your team

Define scope and issues to address in study

Identify data sources and create new integrations as necessary

Agree appropriate baseline visualizations and create your Application

Define time period to be used for full analysis

Work with your team to gather data for this time period

Baseline

Sumerian Data Scientists working on our premises

Load, validate and cleanse data as necessary

Create high-level analysis and visualizations

Assess detailed demand, performance and utilization

Identify issues and make recommendations

Deliver Baseline Report and Application
